Introduction

Congratulations on your purchase of a ClearOne Conference Controller.

The Conference Controller is a highly intuitive 10-inch, touch-screen device that allows users to control their audio conference, including managing contacts and placing and controlling calls. Flexible connectivity options offer an integrator-friendly solution that fits perfectly in any space.

Features include:

- Support for VoIP, Telco, and COLLABORATE Live
- 10.1" capacitive touch screen, 1280 x 800 resolution
- On-screen dialpad
- · Make and receive calls
- · Multi-party conference calls
- · Ability to put calls on hold and transfer and forward calls
- Call history
- Phone book
- Favorites
- · Microphone and speaker mute and volume controls

Packing List

AC Power Adapter

Conference Controller

Power Connections

You can provide power to the Conference Controller in two ways:

- a. With the AC power adapter, connect the power port of the Controller (a) to a standard electrical outlet; or
- b. With a CAT6 cable, connect the LAN (RJ45) PoE port of the Controller (b) to a PoE injector or the Ethernet port of a PoE-capable switch.

Communication Connections

You can provide communications to the Conference Controller in two ways:

- Wi-Fi, or
- Ethernet

Note: If you connect the controller by both Ethernet and Wi-Fi, the Ethernet connection takes precedence over the Wi-Fi connection.

Wi-Fi

Ethernet

Configure the Conference Controller for CONVERGE Pro 2 VoIP/Telco

To configure the Conference Controller for CONVERGE Pro 2 VoIP/Telco, complete the following steps:

1. On the Apply and Restart screen, **tap the CONVERGE Pro 2 VoIP/Telco Dialer icon**.

The system displays the Connections screen.

2. In the upper right, tap Add/Edit.

NOT CONNECTED	ClearOne. 🔗	Θ	\$ \$
